DIATOZ India Pvt Ltd - Bengaluru 05/2019 to currently working
- Web Developer.
- Develop responsive and efficient website design then fetch data from backend.
- Build Front-end using React.js, Vue.js, Angular 8.

Project Summary

LIFEData
- **Technologies used:** Vue Js, Vuex, Bootstrap, JQuery.

- **Description:** LIFEData is a conversational service automation AI technology enabling any business to leverage Online2Offline oppurtunities with Hands-free Voice control. People-first AI for your Business Operations, a human-centric no-code SaaS platform to optimize your unique mix of processes, people, and systems.

OES(Onboarding Entertainment Solution)
- **Technologies used:** Vue Js, Vuex, Bootstrap, JQuery.

- **Description:** OES is Multi-user platform to upload, manage, and stream multimedia content inside the buses and admin can create various user roles under him for different levels of vendors. The end-user can pay and subscribe to the content. The buses could be tracked for the location as well.

ERP(enterprise resource planning)
- **Technologies used:** Angular 8, Angular Material, Bootstrap, JQuery.

- **Description:** ERP is an integrated suite of business applications for HR. This tool share a common process and data model, covering broad and deep operational end-to-end processes for HR. It offer ways to manage company data and streamline employee management tasks like apply leave, apply overtime, view company policies and other duties. You could also track employee performance and identify HR problems before they happen.

TXF(The X Future)
- **Technologies used:** Angular 11, Angular Material, Nodejs, MongoDB, Pubnub, Bootstrap, JQuery.

- **Description:** TXF solution platform is used to match, engage, and implement corporate innovation at scale to develop your business and you can chat with your matched company for this we use PubNub service in angular you can check active users and live updates of chat messages.

Sentinel
- **Technologies used:** Vue js, Bootstrap, flexmonster, Vuex, Jquery.

- **Description:** The scope of this project is to provide the statistical analysis of the data based on their Advertisement, Brand, Category, and their investments. To achieve this scope, I have used Vuejs to index and format the data based on the above categories, and integrated flex monster, chart, and dynamic row and column table in Vue js to show all the data and details on UI.
